Help patients focus on what's important –
going well.

© 2009 American Cancer Society, Inc.

As a physician, you know that a cancer diagnosis is one of the most daunting challenges a person may ever face. The amount of data and information can be overwhelming, especially during such an emotional time.

Now you can offer your patients Circle Of Sharing™ from the American Cancer Society and Microsoft® HealthVault™. This online tool helps patients collect, organize, and store their health information so they can make informed decisions. In a secure environment, patients can share as little or as much as they wish about their diagnosis, treatment, and well-being with people in their "circle."

The American Cancer Society is here around the clock to help guide your patients through every step of a cancer experience. Tell your patients about Circle Of Sharing today – and visit cancer.org/circleofsharing for more information. Together, we can save lives – and get closer to a world with more birthdays.
